

My Lifetime GOAL Statement

I will live an intentional, meaningful life; one that is filled with peace, love and joy. As a Global Citizen it is important to me to have balance in my life planning areas and to use advanced decisions in accomplishing my goals. I want to live with awareness, be loved and appreciated by those whose lives touch mine, and I want help inspire us all to work toward a kinder, more inclusive world by helping people be aware of what is happening and feel good about themselves. I want to build my "lighter footprint" skills using fewer resources, have fun doing almost everything, learn something new each day, smile more and be more playful. I will use my time and effort to help create a welcoming, calm and inspiring home. I will leave each experience and each day knowing the world is a better place.
